

Wayne's World – May 27, 2017

Report: Ken Kirk

Photos: Sandy Kennedy

Wayne Robinson & Ken Kirk, proud to have the members of TSACBA & MLACO view their collections.

Wayne's line up of restored Aristo-Craft boats & collection of vintage water skies & surf boards.

A big turnout of about 90 members of the TSACBA and MLACO were not disappointed. Good weather and an expanded Museum Quality display of Wayne Robinsons unique collection of watercraft, model boats and nautical artifacts. This was supplemented by ten boats and motors from Ken Kirk's collection plus numerous boats and motors brought for the day by various Club members.

The days program included a Classic Glass restoration seminar by Ronny Haylock and Murray Parnell.

Ron Stevenson did a technical demonstration on replacing the seals and rebuilding an outboard motor lower unit.

John Gullick updated us all on the protocol and procedures to follow when applying for a boat registration and for transferring a licence.

There was a good variety of flea market vendors and a number of boats and motors for sale.

Christian Robinson and Ashley put the capper on the day serving up complimentary Pizza they prepared on the spot in one of Wayne Robinsons "Tuscan Chef" Pizza Ovens.

All in all great day to be at Wayne's World in Port Perry. If you missed it.....take advantage of the next opportunity to visit Wayne's collection.

The Gang's All Here!! A large turnout from both the TSACBA & MLACO membership at Wayne's World.

Wayne's World – May 27, 2017

Doug Potts talks to fellow members about the features of his 10' SpiersCraft Micro-Boat.

A/B Class Hydro, "Miss QuickSliver" built by Spike Burns. Motor is a Merc KG7H. From Ken Kirks Collection.

If you drop an Outboard overboard you can hire Wayne's hard hat driver to retrieve it.

Ashley preparing the pizzas ready to be popped into the "Tuscan Chef" oven.

Tim Jackson, Murray Parnell & Jim Watt. Do these guys look like they're having a good day??

Professor Ron Stevenson explaining the mysteries of rebuilding an outboard lower unit.
